## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor make obvious applicant's claimed invention. Applicant's independent claim 1 requires a base, a sight arm pivotally attached to one end of the base and a support arm attached to the other end. A first spring is required to bias the sight arm to a lowered position while a second spring biases a support arm to a raised position; the support arm engaging said sight arm when in a raised position. U.S. 358747 issued to Holman discloses a sight device having a base A, a sight arm B pivotally attached to one end of base A, and a support arm D2 attached to another end of base A. A first spring b7 biases the sight arm in a raised and lowered position via nut b4. However, Holman does not disclose a second spring for biasing the support arm D2 to a raised position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on form PTO-892 are cited as of interest to show similar flip sights.
